

Job Title: Build and Release Controller

Location: London, UK

OpenTV (www.opentv.com) is seeking a BUILD AND RELEASE CONTROLLER.

Job Description Summary:

This individual shall be responsible for defining and ensuring the quality of OpenTV's development source code tree and for conducting and tracking software releases to OpenTV's customers and partners.

Job Responsibilities:

- Definition and enforcement of standards and processes for managing code into the mainline code tree.
- Definition and implementation of a build and release procedure.
- Implementation of an automated quality gate enforcement wherever this is possible.
- Cooperation with our worldwide development peer-teams to insure homogeneous practices.
- Coordinate and conduct code reviews.
- In the capacity of this function, interfacing with development engineers, QA engineers, Project Managers, external customers and other internal and external parties.
- Script development to support our internal development processes and release procedures.

Skills & Qualifications:

- A strong sense of ownership and responsibility of the code-tree.
- Very good understanding of software development life cycle and quality processes.
- Proficient in configuration management practices. At least two years of experience shall be demonstrated.
- Highly effective communicator.
- Good diplomatic skills.
- Patient with attention to details.
- Proficient on scripting language skills (gmake, perl, csh, php, ...)
- Very good knowledge of the C language and real-time, embedded systems concepts.
- UNIX and DOS proficiency is required.
- Proactive and resourceful team-player.
- The ability to work to a deadline.
- The ability to prioritise and schedule work.
