Job Description Summary:

- Responsible, well organized team player with strong communication and customer service skills.
- Excellent written and verbal communication skills must be demonstrated.
- Organization and strict adherence to policy is required in this position. Ability to support established SLA response time and resolution timeframes is critical.
- After hours support will occasionally be necessary. Pager / Emergency Phone duty is required.

Job Responsibilities:

- Administer global WAN and LAN configurations on existing Cisco equipment including ATM PVCs, VLANs, and TCP/IP routing.
- Experience with Fortinet firewalls required
- Manage small global based team of technical administrators.
- Client and LAN-to-LAN (WAN) IPSEC VPN gateway administration.
- Maintain Cisco, Fortinet and Foundry firewall appliances and coordinate upgrades.
- Work with Helpdesk ticketing response system.
- Manage remote access environment and all RAS users including Cisco VPN and SecureRemote.
- Global responsibility for security including network and Internet security, host security and LAN/WAN security. Vulnerability assessments both internal and external. Assist in creation of overall encompassing Master Security Policy.
- Familiarity with BSD, Linux and Unix operating systems and applications.
- Monitor server and network uptime and availability.
- Assist in server and network system inventory.
- Build new network and system deployments according to specified logical plans.
- Cooperation with systems team on maintenance of Solaris, various Linux and Windows 2003 server platforms.
- Participate in Active Directory upgrades.
- Document all current system deployments and log changes.
- Manage new network deployments, consolidations and upgrades on Cisco, Fortinet and Foundry systems.
- Provide problem troubleshooting and resolution to end-user community.
- Implement department policies and procedures.
- Light administration of Hitachi Data Systems SAN

Skills & Qualifications:

- 4 year undergraduate degree. BA or BS in Computer Science, Information Technology (or equivalent) a plus.
- Extensive hands on experience administering Cisco IOS and CatOS on multiple platforms required.
- Previous basic SAN management experience desired. Brocade, StorageTek, and Hitachi familiarity.
- Experience in Windows 2000 & 2003 and Solaris server administration. Systems administration experience in a Windows server environment, Active Directory, NIS, and LDAP.
- Extensive knowledge of TCP/IP, DHCP, WINS, and DNS. Sendmail, Exchange, BIND, and Samba experience desired.
- Experience with Veritas NetBackup and Foundation Suite a plus.
- Previous SQL server or Oracle administration experience a plus.
- CCNA required. CCIE, CCNP, preferred.
- MCP or MCSE a plus.
- Previous hands on experience with open source operating systems such as Linux also a plus.
